## 35. VANILLA PURE ESSENTIAL OIL

**SCIENTIFIC NAME:** *Vanilla Planifolia*

It has a very specific smell. Vanilla Essential Oil greatly relaxes the mind and should be avoided when there is a need to concentrate. Apart from its commercial and baking specialty, it is a favourite amongst the masses for its health benefits too. The health benefits of vanilla essential oil might include its properties of an antioxidant, aphrodisiac, febrifuge, antidepressant, sedative, tranquilizer, and relaxing substance.

**Usage -** The antioxidant properties of vanilla oil protect the body from wear and tear by neutralizing free radicals. It boosts libido. It fights infection. It works as an antidepressant. Vanilla oil is a sedative, so it reduces stress on the body such as inflammation, making it an anti-inflammatory food. It naturally lowers blood pressure by relaxing the body and mind. It also helps to boost mood. It also promotes feelings of calm.

## 36. WINTERGREEN PURE ESSENTIAL OIL

**SCIENTIFIC NAME:** *Gaultheria Procumbens*

**COMMON INDIAN NAME:** *Hemant Hari*

Wintergreen Essential Oil is fresh cleansing and minty. It is refreshing and invigorating. It is popularly used in pain relief medication. Should not be ingested as it is highly toxic. Avoid during pregnancy. Some people use small doses of wintergreen oil to increase stomach juices and improve digestion.

Usage - Wintergreen oil may also be found in insecticides and repellents. It is used as a flavouring agent for products such as candies, toothpastes, and mouthwashes. It can also be used as a scent additive. It works as a natural headache remedy, for chronic nerve pain, PMS symptoms and arthritis. Wintergreen leaves contain an aspirin-like chemical that can help reduce pain, congestion, swelling and fever associated with common illnesses. It can be applied in combination with coconut oil, and it works just like a vapour-rub. It helps combat bacterial growth, viruses and fungi. It can be applied to the dishwasher, showers, toilets and sinks. This prevents growth of dangerous microbes.

## 37. YLANG YLANG PURE ESSENTIAL OIL

**SCIENTIFIC NAME:** *Cananga Odorata*

The delicate and yet the fragrant Ylang Ylang Essential Oil slows the breathing and calms anxiety and is good for frigidity. It is sensual and euphoric. People apply Ylang Ylang oil to the skin to promote relaxation, kill bacteria, lower blood pressure. It is also part of a combination spray used to kill head lice. The smell of this oil in aromatherapy is used for memory and thinking skills.

Usage – Ylang Ylang Oil helps to boost mood, reduce depression, alleviates anxiety, helps to lower blood pressure, stimulate oil production in the skin and on the scalp, repel flying insects and kill bug larvae. It has antifungal properties that work against any attack of fungal infection on the skin. Its use could balance the sebum production of the skin and in turn control acne-breakouts. It even possesses anti-inflammatory properties which could reduce the redness as well as swelling caused by acne. Because of its antimicrobial and antibacterial properties, it could aid in eradicating any scalp related infections. Due to the presence of insecticide properties, the Ylang-Ylang oil is included in many recipes claiming to battle head lice.
